

(Vauxhall, Alberta – April 23, 2023)

The Town of Vauxhall is pleased to announce our municipality was recently awarded a grant through the Alberta Municipal Water/Wastewater Partnership (AMWWP). The funding, delivered through Alberta Transportation, will support up to \$2,241,516.80 in essential upgrades to the core infrastructure to the Sanitary Trunk Main Replacement.

Vauxhall has had a history of sanitary concerns which were inspected and discovered by MPE Engineering with a report to Council back in 2005. The trunk main replacement was one of the recommended solutions to the issues discovered in that study.

With construction anticipated to begin in 2023/2024, the AMWWP grant will fund critical improvements to the sanitary system by replacing the sanitary trunk main from 7th Ave n to the sanitary lagoons a total distance of 2.16 kilometers. The trunk main will be upsized which will alleviate surcharging and allow for population growth. offset capital costs associated with the project, create jobs, and boost the local economy.

The Alberta Municipal Water/Wastewater Partnership provides cost-shared funding to eligible municipalities to help build municipal facilities for water supply and treatment, and wastewater treatment and disposal.

“The Town of Vauxhall is thrilled to receive the grant funding; this is an important maintenance infrastructure project for the Vauxhall residents said Mayor Ray Coad. Following heavy rains in 2010, that led to flooding in Southern Alberta, we had numerous homes in town flood and this project will help alleviate that as our community grows.”

The Town of Vauxhall would like to thank Alberta Transportation and the minister’s committee for their consideration and commitment to investment in our community.
